LinkedIn: [hannasamuel](#)

Address: Ethiopia - Addis Ababa

## Professional Summary

---

Full-Stack Developer specializing in **Odoo ERP customization** and internal business tools. Experienced building end-to-end pipelines that connect **React/JavaScript** frontends to **Python and Odoo** backends — from automated data integrations to real-time dashboards used daily by 1,000+ employees across 6 sites.

## Skills

---

### Frontend

React, JavaScript, HTML5, CSS, Bootstrap

### Database

PostgreSQL, MySQL, MongoDB, Supabase

### Backend

Python (Flask), Odoo API, Odoo XML Framework

### Other

REST APIs, Git, Image Processing Libraries, System Integration

## Work Experience

---

### Full Stack Developer – Top Beverages Industries & Trading

Ethiopia Addis Ababa · May 2025 - Present

- **Architected an end-to-end pipeline** fetching real-time employee data from Odoo to auto-generate front/back ID card layouts, eliminating manual data entry.
- Built a **real-time finance/ERP reconciliation dashboard** cross-referencing transactions across Odoo ERP, POS, and bank deposit records to catch discrepancies automatically.
- Formulated a **biometric data-ingestion pipeline** parsing raw fingerprint logs into clean timestamps, and programmed a customizable **overtime calculation engine** factoring in date ranges, holiday multipliers, and shifting HR policies.
- Implemented **role-based access control (RBAC)** via Odoo's XML framework and built flexible, date-filtered **data export modules** for payroll-ready HR reporting.

## Projects

---

### Biometric Overtime & Access Control Engine

- Custom Odoo 11 module automating overtime calculation and access control for a 1,000+ employee organization across 6 sites.
- [github.com/nansamuel12](https://github.com/nansamuel12)

### Finance & ERP Reconciliation Dashboard

- Real-time multi-system data matching engine preventing financial leakage across Odoo, POS, and bank records.

### Boll Bounding Telegram Bot

- Telegram bot automating speed and direction controls via on-screen buttons and bot commands.

## Education

---

### Bachelor of Science, Software Engineering – Bahir Dar University - Ethiopia - November 2018 - August 2022

- Coursework: system architecture, software design, and engineering fundamentals

## Certifications

---

The Complete Web Development Bootcamp · Git Fundamentals · GitHub Fundamentals
