LinkedIn: [hannasamuel](https://www.linkedin.com/in/hannasamuel)

Address: Ethiopia - Addis Ababa

Professional Summary

Junior Machine Learning Engineer with strong experience in building reliable ML systems for financial risk prediction. Skilled in **Python**, **scikit-learn**, **MLflow**, **FastAPI**, and **Docker**. Experienced in feature engineering, model evaluation, and deploying ML APIs. Passionate about developing scalable and trustworthy data-driven financial solutions.

Skills

Technical Skills

Machine Learning, Feature Engineering, Model Evaluation, Data Analysis, API Development, MLOps, Data Processing, Statistical Modeling

Software Tools

Python, Scikit-learn, Pandas, MLflow, FastAPI, Docker, Git, GitHub Actions, Streamlit, SQL, Jira

Work Experience

Machine Learning Trainee – 10 Academy - Ethiopia Addis Ababa

November 2025 - February 2026

- Built machine learning models for financial risk prediction and forecasting tasks, performing data preprocessing, feature engineering, and exploratory data analysis on real-world datasets.
- Implemented model evaluation techniques including **accuracy**, **precision**, and **ROC-AUC**.
- Collaborated on data science projects focused on fintech and energy market analytics using Python, Pandas, Scikit-learn, and Git.

Projects

Financial Inclusion Forecasting System

- ML model predicting financial inclusion trends from real-world datasets, with full data cleaning, feature engineering, and training in Python/Scikit-learn.
- github.com/nansamuel12/Forecasting-Financial_ethiopian

Brent Oil Price Change Point Analysis

- Bayesian change-point modeling and EDA to detect structural shifts and economic impacts in oil price data.
- github.com/nansamuel12/Detection-of-fraud-cases_e-commerce-and-bank-transactions

Customer / User Data Analysis Dashboard

- Interactive analytics dashboard applying statistical analysis and visualization (Python, Pandas, Plotly) to uncover data patterns.
- github.com/nansamuel12/Customer-Experience-Analytics-for-Fintech

End-to-End ML Pipeline Project

- Full ML pipeline covering preprocessing, training, evaluation, and deployment preparation for production-ready reliability.
- github.com/nansamuel12/medical_prod_info

Education

AI Mastering Training – 10 Academy - Ethiopia - November 2025 - February 2026

- Machine Learning, Data Engineering, Financial Analytics, MLOps, AI Systems

Bachelor of Science, Software Engineering – Bahir Dar University - Ethiopia - November 2018 - August 2022

- Coursework: system architecture, software design, and engineering fundamentals

Certifications

Artificial Intelligence Fundamentals · Data Analysis Fundamentals
